

SOLAR ECLIPSE *Pinhole Projector*

For a safe way to experience and appreciate the solar eclipse happening on April 8th, you can create your own personal pinhole projector by printing out and following the instructions on TOP sheet and BOTTOM sheet.

USE A PIN TO POKE A HOLE THROUGH
THE GREEN DOT

1. Using a pin, pierce through the center of the TOP Card. Keep your back facing the sun while holding both cards.

2. Position the TOP card and the BOTTOM card in alignment, allowing the sunlight to project through the pinhole onto the BOTTOM Card.

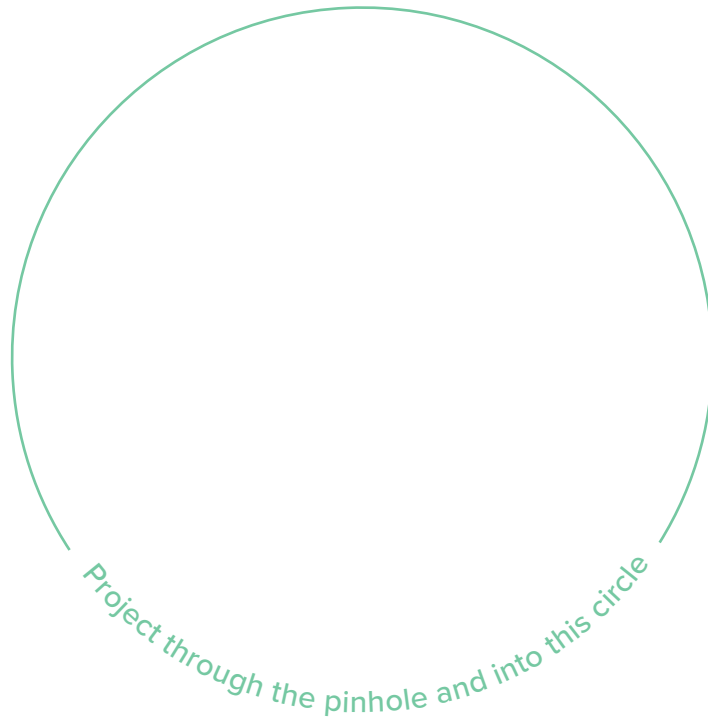

Warning!

Please be reminded to never stare directly at the sun, even when using the pinhole method.
